

Voyager

Model shown includes the optional extended seat back.

Available in Metallic Black, British Racing Green or Ocean Blue.

Engineered to perform

The ElectroKart Voyager leaves all other ride-ons standing. It offers you the ultimate combination of power, performance and stability; all in a superbly engineered machine that quickly dismantles to stow away in the boot of your car. And, when you discover the Voyager costs less than other ride-ons, we think you'll find it impossible to resist the urge to take it for a test drive.

But why not get the whole story first.

Power to Spare Powered by two fully waterproof 24 volt motors and gearboxes. The motors glide you effortlessly along at up to 8mph and provide you with enough power to take 1 in 4 gradients in your stride. Two 12 volt valve regulated lead acid gel filled batteries allow you to drive around 27 holes on a single charge and won't spill or require any maintenance. Now there is a 4 Battery option to give you even more power.

Overnight Charge Your Voyager comes with a fully automatic 24 volt charger, designed to recharge both batteries overnight on board. Just put the batteries on charge and forget about them.

Rugged Build Quality Constructed from high quality steel tubing, phosphated and epoxy coated to give longer life and all weather protection. And the steering track rods use sophisticated technology borrowed from racing go-karts, making them ultra lightweight, and strong with self-straightening 'memory' characteristics.

Microprocessor Technology A fail safe, state of the art 'brain' controls all the power operations of the Voyager and combines safety with ease of operation.

Comfort Steel backed, foam filled and weatherproof, the Voyager bucket style seat is ergonomically designed for a comfortable ride. And, for the taller user, we offer an extended front end to give more leg room.

Bag on Board The vertically mounted bag carrier has been designed to give easy access to your clubs and is secured by two quick release straps. We recommend the ElectroKart Golf Bag, specially designed so that pockets are accessible at all times.

Adjustable Steering Column The steering column adjusts for comfort and easy, step-on access; whilst the heavy duty ABS foot-plate has a non-slip, spike-proof rubber mat.

The New Voyager Heavy Duty Model Delivers 40% more power, for even steeper gradients. With extra wide profile tyres, gearboxes, with Bronze Gears, it is ideally suited for rental use, or for heavier loads.

Always on firm ground

Stability Guaranteed Even on the toughest terrain, you stay steady as a rock. For a start you have 4 wheels, rather than the three offered by so many single seat ride-on carts. Then, the specially designed 'live front axle' lets the front and rear work independently of each other, keeping all four wheels firmly on the ground on any terrain.

Total Control The twist-grip speed control (a left handed version is also available for those of you who have difficulty using your right hand) takes just a quarter of a turn to give you maximum speed. While a three position rocker switch puts you in forward or reverse mode, as well as a reduced speed of 4 mph for pavement use - a legal requirement in the UK.

Safety On/off switch with removable key, plus a built-in device that prevents full speed take off if the throttle has accidentally been operated before turning the key switch on. The ElectroKart Voyager also has Thermal Safety Overload.

Parking The fully automatic anti-runaway solenoid parking brake will hold the Voyager on any hill, allowing you to concentrate on your shot.

Braking Back the throttle off slightly to slow down, or let go completely to stop. The automatic regenerative braking system means the Voyager maintains speed, even on the steepest of slopes.

Tyres and Wheels The 'split rim' wheels are made from shock absorbing plastic. While the wide, low pressure 4 ply pneumatic tyres (with inner tubes) are grass friendly and have the approval of greenkeepers.

Take it wherever you play

The real beauty of the ElectroKart Voyager is the ease with which you can take it apart. No other buggy folds away to be as neat and compact as the ElectroKart Voyager. It dismantles simply, in no time at all, to fit neatly into the boot of most saloons and all hatchbacks. Which makes it the most convenient, tried and tested, single seat, 4 wheel ride-on you can buy. There is also a new shorter, compact version especially for smaller boots.

Extras that make the difference

Double Bag Support

Enables you to take the weight off your friend's or partner's feet by carrying their bag too.

Umbrella Holder

Come rain or shine, our umbrella holder will hold your golf umbrella securely at any angle.

Extended Seat Back

For extra comfort and support, our extended seat back transforms your normal seat.

ElectroKart Bags

Tough and stylish, the ElectroKart Golf Bag has been specially designed to fit our carts. With easy

access to all compartments and pockets they make the perfect golfing partner for the Voyager.

Alloy Folding Loading Ramp's

For easy access in and out of your car, Alloy folding loading ramp's makes the Voyager even more enjoyable to use.

Caps, Polo shirts and Towels

Caps come in Blue, Polo shirts look great in white and black and the towels are very practical in black and all compliment the Voyager's very stylish appearance.

The best value on 4 wheels

All our carts are designed by golfers, for golfers. So you can be sure that we've thought of every last detail to help you take the weight off your feet and improve your game. For such an exceptionally well engineered machine, we think you'll agree that the Voyager offers exceptional value.

Book Yourself a Test Drive Today

There's nothing quite like getting into the driver's seat and trying the Voyager for yourself. Out on the golf course, where it really counts. That's why we'll be happy to arrange a test drive for you at a time convenient to you. So just call ElectroKart on **01233 666000** and we'll do the rest.
